

## KOURA-TINT 2

- **KOURA-TINT 2:** White liquid dispersion binder free pigment concentrates with maximum pigment loading which reduce color usage in tinting of thermoplastic master batches application including tinting of MMA syrup for both interior and exterior cast acrylic.
- **KOURA-TINT 2:** Ideal suitable viscosity to easy incorporation with different systems for ideal color homogeneity and also easy to pump in factory system.
  - High selected titanium dioxide & dispersing agent specially for tinting MMA syrup & master batches applications also available in all main colors based on a high quality selected pigments with a very good hiding power, fineness and light fastness.

### Typical properties:

- **Color :** white
- **Particle size range:** < 5 microns.
- **Solvent:** phthalate type (DEP).
- **Density :** 2.4 Kg/L

color	Color index	Pigment content %	Light fastness	Heat resistance C
White	P.W 6	80%	8	>200
